Jan Misker works as a project manager in V2_Lab for the Unstable Media. He is responsible for managing Art & Technology projects that have a strong technical aspect, for example involving Artificial Intelligence or Augmented Reality. In this capacity he bridges artistic concepts to the latest technological developments. Projects he has lead include a wide range of artworks, science collaborations, the Summer Sessions network for Talent Development, and curating and coordinating art exhibitions.

Prior to his appointment at V2_, Jan worked as a researcher in the field of Man Machine Interaction at Delft University of Technology, The Netherlands and Carnegie Mellon University, USA.

Jan holds an MSc in Cognitive Science and Engineering / Artificial Intelligence from the University of Groningen, The Netherlands.

Besides his work at V2_ Jan used to be active as a dancer and festival programmer in the field of modern dance. Furthermore he recently got certified as a Yoga teacher.
